

Lunch Time Recycling Program

Lunch Time Recycling Program

I Do We Do You Do

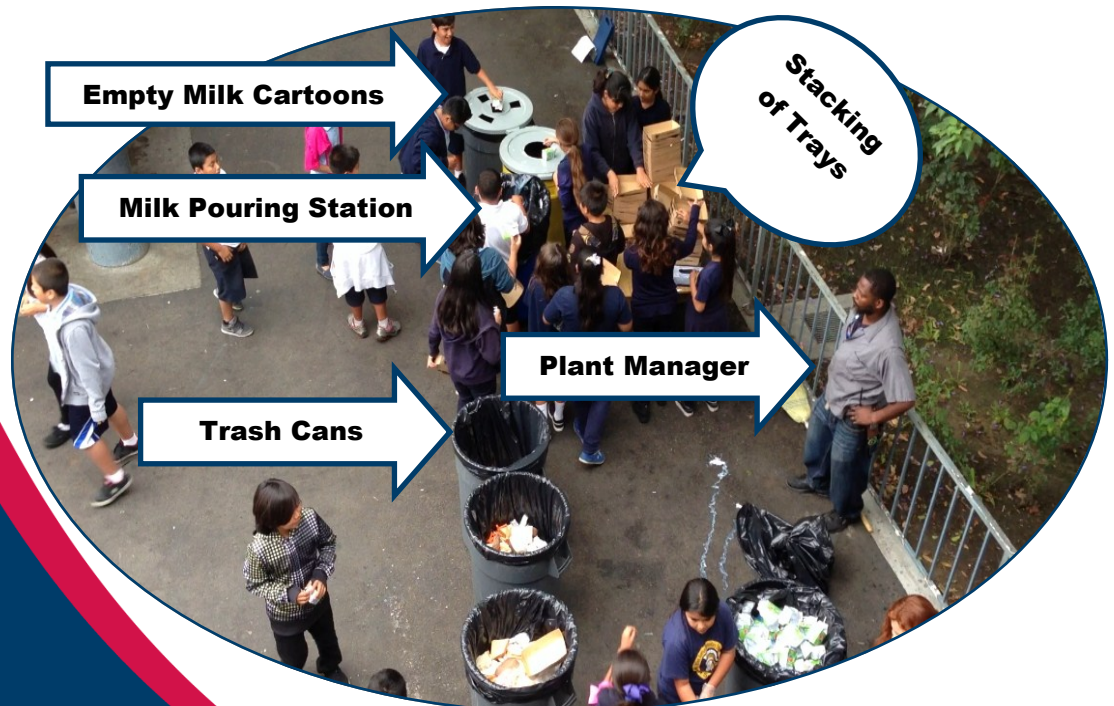

What is the Lunch Time Recycling Program?

The Lunch Time Recycling Program is a program designed to assist and train Plant Managers, Principals and Students how to recycle during lunch. The "I do, We do, You do" is the concept to implement in order to maintain sustainable results at your location. Each location that needs support with implementing the program will receive 2-5 day hands on trainings and support from Republic Services Recycle Staff. Typical results after the implementation process range from 40-50% reduction of trash bags, an increase in recycle volume and a significant reduction of weight lifted daily by each Plant Manager. This process is accomplished by training students on how to stack lunch trays, pour off milk inside identified receptacles and standardized creation of waste stations designed to increase recycling participation.

Why Should I do this?

- | | |
|------------------------------------|--|
| Reduction of Weight per Bag | Removal of Milk Smell |
| Reduction of Bags | Cleaner Trash Bins |
| Reduction of Needed Trash Bins | Push Milk Weight Versus Lift |
| Easier to Manage Disposal of Waste | Less Susceptible to Maggots, Flies and Insects |
| Potential Reduction of Strains | Less Pressure on the Back |
| Controlled Disposal Process | Elimination of Milk Spills from Bags Breaking |
