

# Approved Compostable Bags

Plain uncoated (no shine) paper bags and compostable bags are good ways to contain and carry food scraps to your food and yard waste cart. Compostable bags are made of plant-based materials that break down in the composting process. They are not plastic. Plastic bags do not break down and will ruin the compost. Even “biodegradable” bags may simply break down into small pieces of plastic. Plastic and “biodegradable” bags are not accepted in food and yard waste cart.

Only the following bag brands, approved and tested by our composting facility, are accepted. This logo also identifies compostable bags accepted in Bellevue’s food and yard waste carts.
